- The seller warrants this cat to be FeLV and FIV negative provided the cat is tested within 48 hours. If within the period of time the cat should be diagnosed with a life threatening illness by a qualified licensed veterinarian, the cause of which is attributable to the seller, the cat will be replaced at no charge, provided that the seller is notified within 48 hours after the diagnosis. The seller will replace the cat with one comparable to the one originally purchased. The seller agrees to replace the cat within an 8 month period from the date the cat was diagnosed. If a cat is not offered by this time, then the seller will refund the amount applied toward the cat. If a cat is available within the 8 month period but can not be delivered due to shipping restrictions then the time frame will be extended up to 30 days. The seller has no control of the weather and airline restrictions. Replacement cats and refunds are non-transferable. If a cat should expire within the 48 hour period the seller reserves the right to request a necropsy (performed by vet of seller's choosing, located in the general area of the buyer) on the cat at the buyer's expense until results are provided to the seller. No refund or replacement will be provided if the results indicate the cat suffered injury, neglect or mistreatment. (Drainage from the eyes are excluded because it is very common in the Persian breed)
- The seller also warrants this cat to be free of fleas, worms, ring worm, ear mites and bacteria infections. If the veterinarian discovers any of these to be present at the time of the wellness evaluation the seller will accept responsibility for treating these problems. The seller will NOT be held accountable for these if you board the cat at the vet during the day and pick it up at a later time. You MUST remain with your cat during the initial first visit. This is to prevent your cat from being caged beside or near another animal that may have these problems. The seller reserves the right to request the cat be returned to the cattery and treated here (Max. time 8 weeks), provide the necessary medications to the buyer to treat the cat or we may choose to reimburse you for the medications needed to treat these problems on your own. We will not refund or replace a cat if any of these problems are present.
- We guarantee this cat to be PKD negative. If breeding rights have been purchased, this cat must be tested for PKD prior to breeding (est. 1 year of age). Once negative results have been provided to the seller, breeding rights will be issued to the registration of this cat. If the cat tests positive, the cat must be returned to the seller, and it will be replaced with one of equal value. Seller reserves the right to request the cat to be retested at a veterinarian of her choosing. Buyer will pay for the retest, but both tests will be reimbursed by the seller if both tests are positive. This cat may not be bred to a cat that is PKD positive or a cat that has not been PKD tested.
- Persians sold without breeding rights must be spayed or neutered before the registration forms will be released to the buyer. The buyer has 8 months to have the cat altered and to return documentation to the seller that the procedure has been performed. If documents are not provided by the stated time they will not be provided at all. Documents are due by the following date: _____
Only cats of show quality will be sold with breeding rights. Breeding rights are additional charge and must be requested and sold at the time the cat is purchased.
- Special Documentation: _____
